Professional Summary

Eighth-semester Economics student at the National Autonomous University of Mexico (UNAM), with a strong academic and professional interest in macroeconomics, quantitative analysis, and business economics. Experienced in data cleaning, manipulation, and workflow automation using R, Python, and Excel for economic and financial analysis.

Currently working at the International Economic Analysis Division of Banco de México, where I monitor global macroeconomic indicators, automate database processes, and develop analytical inputs that support research and policy-oriented work within the central bank. My interests lie particularly at the intersection of monetary economics, data science, and applied econometric modeling.

Education

B.A. in Economics

National Autonomous University of Mexico (UNAM)

August 2022 – Present
